Meeting Point Ceramics

TASK
Technologie-Agentur
Struktur-Keramik

Innovation by Cooperation

Technical ceramics

include properties which offer the development of new and particular fields of application. The one who keeps the requirements of the material will get structural parts with

- high hardness and strength
- high temperature aptitude
- good corrosion resistance to acids and alkaline solutions
- low specific weight
- chemical resistance
- low to high thermo resp. electric conductivity

The materials become already established in many fields where the function with other materials is only reached very hard. Meanwhile the range of products includes everything from the wear-resistant die ceramics to substrate plates for the electronic industry, porous structures for the diaphragm and filter technology, firm valves for the plant technology, deposits and much more.

Get information

from the Meeting Point Ceramics and the production examples of our members in the field of application or about innovation measures and planned projects in the field of activities. Use the contact form for a first consulting free of charge. We will organize the professional partner for your inquiry.

Meeting Point Ceramics

In the Meeting Point Ceramics a wide range of material groups is represented. Within the framework of the permanent exhibition in Dresden containing more than 1,000 ceramic exhibits and applications of different members one can find boron nitride for specific crucibles in the field of crystal growth as well as typical aluminum oxide for wear protection. One focus is to demonstrate the numerous production technologies for ceramic components that can either be manufactured as prototypes or as line-produced components. Close cooperation between the researchers of the Fraunhofer Allianz Hochleistungskeramik and the ceramic manufacturers has enabled users to quickly realize their ideas. Through collaboration between research institutes and manufacturers the Meeting Point Ceramics has established itself as inherent part within the technology transfer landscape.

Performances DL-008-2010

For members TASK offers the possibility to present products in the scope of the permanent exhibition at Meeting Point Ceramics in Dresden. Hereby the exhibits are presented with respective company labeling and with the enclosed company information.

At the external events, the members are also presented by company information leaflets and exhibits. Here especially the Hannover Industrial Fair is to be mentioned. There is also the possibility for members to present themselves for easy terms on the common booth of Meeting Point Ceramics. Experts from the pool of members are asked for lectures at internal and external events.

Fees:

For the membership in the Meeting Point Ceramics TASK charges per year:

Euro 2.050,00 plus VAT.

This includes the presentation and link on our website www.task.info and at our permanent exhibition in Dresden and at external events as well. Further performances will be charged according to a special agreement:

Term/Conditions:

In the first step the membership in the Meeting Point Ceramics is agreed for a period of 2 years. A termination can be made in written within a six-month period to the end of the contract.
