

Application "Ceramics Meeting Point" / CERAMITEC 22.-25.05.2012

- I do not want to participate at a fair presentation
- Herewith I approve the participation at "Ceramics Meeting Point" at CERAMITEC 2012 and order the following services (plus VAT)

**Participants address, signature,
company stamp:**

Please return by fax: +49 (0)351 2554050

- 1. All-inclusive presentation €6000/€6500
- 2. Individual concept up to €

This registration becomes only binding after repeated confirmation of the booth concept by the fair organizers (Messe München GmbH).

I Services

Fair and booth design will be planned by TASK GmbH following the presentation in 2009. It is the aim in 2012 to present ceramic components for energy and environmental technologies in combination with their efficient production. The infrastructure of the booth includes: meeting room, phone/fax/copier, small kitchen, catering for booth staff and visitors, storage area and service staff taking contact data in your absence.

Ceramic Meeting Point is also central platform for the participants of CMCEE in Munich. In cooperation with the exhibitors, the trade fair event "Day of Technical Ceramics" will be organized on May 23, 2012.

II Terms of payment

The invoice is issued in two steps: 50% after confirmation of order and 50% six weeks before CERAMITEC starts. Both invoices must be paid within 14 days. The prices are exclusive of VAT.

You will get a confirmation of your order after the booth area has been confirmed by Messe München GmbH.

III Availability

The offer is subject to agreement by Messe München GmbH and availability of the exhibition area. TASK tries to find an equal position for each participant. The booth area is allocated according to the date of receipt of order.

Presentation at CERAMITEC 22.-25.05.2012

Dear Sir or Madam,

in 2012, the international conference “CMCEE – Ceramic Materials and Components for Energy and Environmental Applications” will take place in Germany for the first time. In this context TASK organizes Ceramics Meeting Point in Munich and combines the presentation of components with the latest manufacturing technologies and equipment. This way, a new network is developed. By the joint presentation of component’s manufacturers and experts for the production of these components and systems additional target groups are addressed.

Use the opportunity to try out the motto “By cooperation to innovation”. Participants of CMCEE and exhibitors of CERAMITEC, who would like to use Ceramics Meeting Point for accompanying presentations, are provided individual concepts.

Please find further information on www.ceramitec.de and www.cmcee12.de

Yours faithfully

Dr.-Ing. Michael Zins
